Proactive and driven Computer Science student with a specialization and passion in Artificial Intelligence (AI), complete with extensive portfolio of completed projects. My keen sense of curiosity, resilience, and work ethic has fueled hands-on experience in AI. My project-centric approach has facilitated the development of innovative solutions, broadened my knowledge, and refined my problem-solving skills. Actively seeking an opportunity to further develop my expertise in AI-related fields, contributing meaningfully to real-world technological advancements.

Education

BINUS University (GPA: 3.96 / 4.00)

2020 - present

- Granted a full 4-year scholarship and took courses focused on AI (Deep Learning, Machine Learning, etc.) and successfully finished all course with the highest grade.
